TAILORED DRUG SOLUTIONS

Nordion built on its decades of experience in processing, packaging and delivering a unique portfolio of medical isotopes, to offer contract manufacturing services to biotechnology and pharmaceutical companies around the world.

We offer tailored solutions, leading expertise, and service capabilities for radiopharmaceutical clinical and commercial manufacturing, and radiation-based medical device development.

At Nordion, we work with you to develop customized solutions—bringing new drugs from concept to market reality faster.

EXPERT CONTRACT MANUFACTURING SERVICES

We are a proven partner who offers a breadth of radiopharmaceutical services and expertise to help with your custom drug requirements.

Radiopharmaceutical Development, Production, Processing and Purification

We maintain a supply of radioisotopes and a host of radiopharmaceutical hot cell suites for contract manufacturing and production. Our highly trained, specialized team prepares radiopharmaceuticals for customers around the world.

Packaging Development and Labeling

Radiopharmaceutical unit doses can be packaged in a variety of configurations and shipped under strict environmental controls.

Warehouse / Inventory

We maintain an enhanced fleet of radiopharmaceutical shipping containers in an environmentally and access controlled warehouse.

Waste Handling

We provide comprehensive waste management solutions for radioisotopes and radiopharmaceuticals.

Regulatory Affairs

We hold an excellent record of regulatory compliance with key international regulatory agencies including the United States Food & Drug Administration (USFDA), United States Nuclear Regulatory Commission (US NRC), United States Department of Transport (US DOT), Canadian Nuclear Safety Commission (CNSC), Health Canada and European Medicines Evaluation Agency (EMA).

Distribution / Logistics

Our dedicated fleet takes product to commercial carriers for distribution to customers worldwide, usually the next day.

Quality Assurance / Quality Control

Our team of quality assurance professionals—working with state-of-the-art equipment—assures products meet or exceed specifications. Our innovative ventilation system addresses the conflicting demands of nuclear ventilation (protect the people) and pharmaceutical ventilation (protect the product). And all key facility parameters are monitored 24/7 to assure ongoing compliance.

CUSTOMIZED SOLUTIONS

Bringing Products to Market Faster

Proven Partnerships

Here is a sample of some of our past and current commercial partnerships.

PREVENT.
DIAGNOSE.
TREAT.

Nordion Inc. is a global health science organization that provides market-leading products used for the prevention, diagnosis and treatment of disease.

We are a leading provider of medical isotopes and sterilization technologies that benefit millions of people around the globe. Our products are used daily by pharmaceutical and biotechnology companies, medical-device manufacturers, hospitals, clinics and research laboratories.
