Nordion Gamma Irradiators

Industry Leading Standard Safety and Design with Flexible Technology Tailored to You

nordion.com
When developing an irradiator option, we will ask you the following questions:

- Do you know where you irradiator will be located and have you investigated the local regulatory requirements for a new irradiator facility?
- Do you have a budget and a timeline?
- How is your product currently being processed?
- Does your product require a minimum or maximum turnaround time?
- Are there special handling or processing conditions required for your product?
- Do you know what your product volumes, densities, and dose specifications are?
- How do you expect your processing requirements to change in the next 5 years? 10 years?
- How will your product be packaged? Do you know what the box/pallet/drum sizes will be?

Standardized Quality, Customized Solutions

Each irradiator that Nordion builds is customized to what you need. We have standard designs which we can use as a starting point, or we can create a new design for your unique requirements at any scale. All of Nordion’s irradiators meet internationally-recognized radiation safety and security standards, such as 10 CFR Part 36, IAEA SSG-8 and ANSI 431D. All of Nordion’s irradiators also meet ISO standards for equipment design and automation safety standards. We can provide CE marking where required.

Nordion Works With You from the Beginning

Our goal is to provide the right gamma system at the right price to help you grow your business.
